MEMORANDUM FOR: Chief, Arms Control Intelligence Staff  
FROM: Director of Central Intelligence  
SUBJECT: Leslie Gelb's Article in NYT Magazine,  
5 June 83, re Arms Control

1. I'm sufficiently concerned about the questionability of adequate verification to be a little intrigued with Gelb's thesis of focusing on small steps which will promote stability, if not significantly reducing arms, and which can be verified with greater certainty.
2. I'd like your view on the verifiability of the items I've marked in the right-hand margin, as well as any other related notions which may come to you.
